3" 1502 MANIFOLD & FLOW LINE

PRODUCTION TESTING / FLOWBACK MANIFOLD & FLOW LINE 3” 1502

Reform Energy Service's 3" 1502 choke manifold and flow line enables us to control the well while allowing different choke sizes to be flowed through over a short period of time without having to shut in the well flow to change the choke size. The choke boxes can accept either fixed or adjustable chokes.

Union Type	Size	MAWP [psi] Standard Service	MAWP [psi] H2S Service
1502	3"	15,000	10,000

MANIFOLD & FLOW LINE

- 3" 15,000 / 10,000 psi
- 3" 1502 Premier plug valves
- Dual Choke
- Skid mounted Manifold
- Multiple ½" NPT threaded coupling for pressure taps
